

This book deals with the syllabi requirements of ANNA UNIVERSITY (Regulations 2021) and other Deemed Universities in Tamilnadu. Fundamental concepts are explained with neat diagrams and illustrative examples are presented for clear understanding of the subject. Best selling textbook, widely used by both faculty and students for its uniqueness of presentation of the subject in simple and lucid manner.

Dr.N.KOTTISWARAN is the Principal of INFO Institute of Engineering, Coimbatore. He has graduated in Civil Engineering from Coimbatore Institute of Technology, Coimbatore and obtained his master degree in Structural Engineering from P.S.G College of Technology, Coimbatore. He has been awarded doctoral degree by Bharathiar University for his thesis "Study on strength and behaviour of thin walled cold formed steel - concrete composite beams under flexure and shear."

#### Salient features

- Clear and lucid presentation of the subject.
- A large number of worked out examples
- Typical solved university questions in each chapter
- More number of exercise problems with answers
- Inclusion of chapter objectives and review questions
- Provides a step-by-step approach for solving the problems

ISBN 978-81-932242-1-1

# Contents

<b>1</b>	<b>Introduction</b>	<b>1 - 1</b>
1.1	Importance of Engineering Mechanics .....	3
1.2	Particle and Rigid body.....	3
1.3	Mass and Weight .....	4
1.4	Units of measurements .....	4
1.5	Laws of Mechanics.....	6
1.6	Principle of Transmissibility of forces .....	6
1.7	Lami's theorem.....	6
1.8	Parallelogram law of forces .....	7
1.9	a) Triangle law of forces.....	7
	b) Polygon law of forces.....	7
1.10	Scalar and vector Quantities.....	7
1.11	Vector and vector operations .....	8
1.12	System of forces .....	15
	Review Questions .....	19

<b>2</b>	<b>Statics of Particles in Two Dimensions - Resultant force</b>	<b>20 - 5</b>
2.1	Introduction .....	21
2.2	Resultant force .....	21
2.3	Resultant force of collinear forces.....	22
2.4	Resultant force of concurrent forces .....	23
2.5	Resultant force - Graphical method .....	38
	Solved University Questions .....	39
	Review Questions .....	48
	Problems for practice.....	48
	Answers.....	50

<b>3</b>	<b>Equilibrium of Particles in Two Dimensions</b>	<b>51 - 5</b>
3.1	Introduction .....	52
3.2	Equilibrium and Equilibrant.....	52
3.3	Conditions of Equilibrium.....	52
3.4	Principles of Equilibrium .....	53

COIMBATORE - 641 107

3.5	Solution of Equilibrium of coplanar forces.....	53
3.6	Lami's theorem.....	54
3.7	Free body diagram.....	58
3.8	Action and Reaction.....	60
3.9	Types of Equilibrium.....	80
	Solved University Questions.....	81
	Review Questions.....	94
	Problems for practice.....	94
	Answers .....	97

## **4** Forces in Space - Resultant and Equilibrium of Particles In Three Dimensions (Vector Approach)

98 - 131

4.1	Introduction .....	99
4.2	Vector Approach.....	99
4.3	Force Vector.....	100
4.4	Rectangular Components of a Force.....	100
4.5	Writing the given force in Vector form.....	102
4.6	Important Vector operations.....	103
4.7	Position vector .....	104
4.8	Force vector interms of co-ordinates .....	104
4.9	Resultant force of coplanar concurrent force system.....	106
4.10	Conclusion.....	108
4.11	Rectangular components of a force in space .....	108
4.12	Direction cosines .....	110
4.13	Unit vector.....	111
4.14	Position vector .....	111
4.15	Force vector when two points on its line of action are given ..	111
4.16	Resultant force of a force system in space .....	115
4.17	Equilibrium of particles in space.....	116
	Solved University Questions.....	124
	Review Questions.....	129
	Problems for practice.....	129
	Answers.....	131

## **5** Statics of Rigidbodies In Two Dimensions -

### Resultant force

132 - 161

K.1	Introduction .....	133
-----	--------------------	-----

5.2	Resultant force of parallel forces .....	133
5.3	Varignon's theorem .....	135
	Solved University Questions .....	151
	Review Questions.....	161
	Problems for Practice .....	161
	Answers .....	163

## **6** Statics of Rigid bodies – Force-Couple System 164 – 192

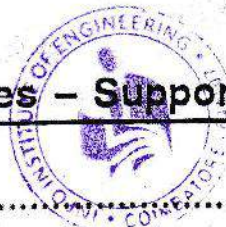

6.1	Introduction.....	165
6.2	Couple .....	165
6.3	Types of couple.....	166
6.4	Resolution of a force into a force and a couple at a point.....	167
	Solved University Questions .....	182
	Review Questions.....	189
	Problems for Practice .....	189
	Answers.....	192

## **7** Equilibrium of Rigid bodies in Two Dimensions 193 – 212

7.1	Introduction.....	194
7.2	Conditions of Equilibrium .....	194
7.3	Equations of equilibrium for special cases.....	195
7.4	Principles of Equilibrium .....	196
7.5	Freebody diagram of a rigid body .....	197
	Solved University Questions .....	206
	Review Questions .....	211
	Problems for Practice .....	211
	Answers .....	212

## **8** Equilibrium of Rigid bodies – Support Reactions 213 – 250

8.1	Introduction.....	214
8.2	Support reactions of beams .....	214
8.3	Statically determinate structure.....	219
8.4	Analytical method of finding support reactions of a beam.....	219
8.5	Moment of uniformly varying load .....	234
8.6	Support reactions of trusses .....	236
	Solved University Questions.....	240
	Review Questions.....	250

PROBLEMS FOR PRACTICE .....	250
Answers.....	252

**9 Analysis of Pin Jointed Plane Trusses** 253 – 315

9.1 Introduction.....	254
9.2 Frame and Truss .....	254
9.3 Classification of Trusses .....	254
9.4 Perfect frame.....	256
9.5 Imperfect frame .....	256
9.6 Common types of Roof Trusses .....	257
9.7 Assumptions made in the Analysis of Perfect frame .....	257
9.8 Analysis of Perfect frame.....	257
9.9 Nature of Member force .....	258
9.10 Method of Joints .....	259
9.11 Special Conditions .....	260
9.12 Analysis of Cantilever Trusses by Method of Joints.....	288
9.13 Method of Sections.....	292
9.14 Tension Co-efficient Method.....	302
Problems for Practice .....	311
Answers.....	314

**10 Forces in Space - Resultant and Equilibrium of Rigid bodies in Three Dimensions (Vector Approach)** 316 – 346

10.1 Introduction.....	317
10.2 Moment of a force .....	317
10.3 Resultant force of spatial parallel forces .....	325
10.4 Equilibrium of spatial parallel forces.....	327
10.5 Resultant force of Non-concurrent and Non-parallel forces .....	328
10.6 Couple in vector form .....	329
10.7 Equilibrium of Non-concurrent and Non-parallel spatial forces.....	333
10.8 Equilibrium of Rigid bodies in three dimensions.....	334
10.9 Procedure for Analysis .....	336
Solved University Questions.....	341
Review Questions.....	344
Problems for practice.....	344
Answers.....	346

# Engineering Graphics

In First Angle Projection

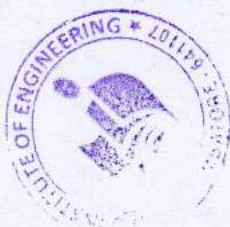

Multi Colour Edition

This book is designed for First Year B.E /B.Tech Students of all disciplines. Basic and Fundamental concepts are focused. Necessary supporting diagrams including Pictorial view and visualisation of the object are presented for the solution of problems.

Dr. N. KOTTISWARAN is the Principal of **INFO Institute of Engineering**, Coimbatore, having more than 25 years of experience in teaching, research and administration. He has graduated from Coimbatore institute of Technology, Coimbatore and obtained his master degree from PSG College of Technology, Coimbatore. He has been awarded Doctoral degree by Bharathiar University, Coimbatore. He has authored many books including the most popular book "Engineering Mechanics."

Free booklet as a supplement containing solutions to ANNA UNIVERSITY Questions

# CONTENTS

## **PART A – BASIC CIVIL ENGINEERING**

### **UNIT – I**

#### **Chapter 1 – SURVEYING - BASICS**

1 –

1.1. Introduction 1.2. Importance of Surveying 1.3. Objectives of Surveying 1.4. Types of Surveying  
1.5. Classification of Survey 1.6. Principles of Surveying

#### **Chapter 2 – SURVEYING – MEASUREMENT OF DISTANCES**

7 – 1

2.1. Introduction 2.2. Methods for Linear Measurements 2.3. Methods of Direct Measurement  
2.4. Instruments used for chain surveying 2.5. Technical terms used in chain surveying 2.6. Principle of  
chain surveying 2.7. Method of Erecting Perpendicular Line

#### **Chapter 3 – SURVEYING - MEASUREMENT OF ANGLES**

16 – 3

3.1. Introduction 3.2. Bearing of a line 3.3. Systems of Bearing 3.4. Comparison between WCB  
and RB systems 3.5. Conversion of Bearings from one system to the other 3.6. Instrument used for  
taking Bearings 3.7. Calculation of Included angles from Bearings 3.8. Traverse

#### **Chapter 4 – LEVELLING**

35 – 4

4.1. Introduction : 4.2. Objectives of Levelling : 4.3. Levelling Instruments 4.4. Technical terms  
used in Levelling 4.5. Setting out of Instrument and taking levelling staff reading 4.6. Types of Levelling  
4.7. Comparison between Simple Levelling and Differential Levelling 4.8. Booking and Reduction of  
levels 4.9. Comparison between Height of Instrument method and Rise and Fall method

#### **Chapter 5 – SURVEYING - DETERMINATION OF AREAS**

48 – 6

5.1. Introduction : 5.2. Methods of Evaluating the area 5.3. Comparison between Trapezoidal rule  
and Simpson's rule.

#### **Chapter 6 – CIVIL ENGINEERING MATERIALS**

61 – 1

6.1 Introduction 6.2 Properties of Building materials 6.3 Types of Rocks 6.4 Quarrying of stones  
6.5 Dressing of stones 6.6 Uses of Stones 6.7 Qualities of Good Building stones 6.8 Quarrying of stones  
6.9 Common Building stones and their uses 6.10 Raw Material of Brick 6.11 Composition of Good brick  
6.12 Manufacture of Bricks 6.13 Uses of Bricks 6.14 Classification of Bricks 6.15 Size and weight  
of Bricks 6.16 Quality of Good bricks 6.17 Tests on Bricks 6.18 Qualities of sand 6.19 Classification  
of Sand 6.20 Uses of sand 6.21 Bulking of Sand 6.22 Tests on Sand 6.23 General Properties of Cement  
6.24 Uses of Cement 6.25 Composition of ordinary Cement 6.26 Manufacture of Cement  
6.27 Manufacture of cement by wet process 6.28 Testing of Cement 6.29 Varieties of cement  
6.30. Qualities of Good cement (Ordinary Portland Cement) 6.31 Ingredients of Cement Concrete  
6.32 Properties of Cement Concrete 6.33 Proportioning of concrete 6.34. Water - Cement ratio  
6.35. Workability of concrete 6.36 Types of concrete 6.37 Curing of concrete 6.38 Uses of concrete  
6.39 Tests on concrete 6.40 Properties of Mild Steel 6.41 Market forms of steel.

## Chapter 7 – FOUNDATIONS

99 – 1

7.1. Introduction 7.2. Importance of Foundation 7.3. Widening of Wall, Column etc., at Foundation  
7.4. Objectives (or) Functions of a Foundation 7.5. Essential requirements of a Good foundation  
7.6. Bearing Capacity 7.7. Types of Foundation 7.8. Comparison between Shallow and Deep foundation  
7.9. Shallow Foundations 7.10. Special types of Shallow Foundation 7.11. Deep Foundation  
7.12. Causes of Failure of Foundations

## Chapter 8 – STONE MASONRY

126 – 1

8.1. Introduction 8.2 Masonry and stone Masonry 8.3 Varieties of stones used for stone masonry  
8.4. Stone Masonry : Important Technical Terms 8.4. Classification of stone Masonry 8.5. Important  
points to be observed during stone masonry construction.

## Chapter 9 – BRICK MASONRY

138 – 1

9.1 Introduction 9.2 Materials for Brick masonry 9.3 Brick Masonry - Important Technical Terms  
9.4 Brick Bonding 9.5. Rules for Bonding 9.6. Types of Bond 9.7. Important points to be observed  
during Brick Masonry Work 9.8. Comparison of Stone masonry and Brick masonry

## Chapter 10 – BEAMS, COLUMNS, LINTELS

151 – 1

10.1. Introduction 10.2. Types of Beam 10.2. Types of Column 10.3. Types of Lintels

## Chapter 11 – ROOFING

167 – 1

11.1. Introduction 11.2 Basic forms of Roof 11.3 Selection of Roof (or) Roof Covering material  
11.4 Requirements of a Roof 11.5 Flat Roof 11.6 Types of Flat Roof 11.7 Pitched Roof-Important  
Technical Terms 11.8 Types of pitched Roof 11.9 Types of wooden pitched Roofs 11.10 Types of steel  
Roofs 11.11 Pitched Roof coverings

## Chapter 12 – FLOORING AND PLASTERING

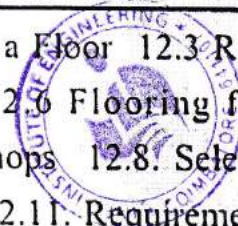

183 – 1

12.1 Introduction 12.2 Functions of a Floor 12.3 Requirements of a good floor 12.4 Components  
of a Floor 12.5 Types of Flooring 12.6 Flooring for Residential and Commercial Buildings  
12.7. Flooring for Factories and Workshops 12.8. Selection of Flooring materials 12.9. Purposes  
of plastering 12.10. Mortars for plastering 12.11. Requirement of a good plaster 12.12. Method of Plastering

## Chapter 13 – MECHANICS

196 – 2

13.1. Introduction 13.2. External force 13.3. Effect of Axial forces 13.4. Stress 13.5. Strain  
13.6. Hooke's law 13.7. Change in length 13.8. Shear stress and Shear strain 13.9. Shear Modulus (or)  
Modulus of Rigidity 13.10. Lateral strain and Longitudinal strain 13.11. Poisson's Ratio 13.12. Volume  
change strain 13.13. Bulk Modulus 13.14 Elastic Constants 13.15. Factor of Safety

Dr. N. KOTTISWARAN,

INSTITUTE OF ENGINEERING,  
N.H. 209, SATHY ROAD, KOVILPALAM,  
COIMBATORE - 641 107

## Chapter 14 – DAMS AND BRIDGES

217 – 22

14.1. Introduction 14.2. Purpose of Dam 14.3. Selection of site for Dam 14.4. Classification of Dams 14.5. Comparison of Different types of Dam 14.6. Components of a Bridge 14.7. Classification of Bridges 14.8. Important types of Bridges

## Chapter 15 – BASICS OF INTERIOR DESIGN AND LANDSCAPING

237 – 24

15.1. Introduction 15.2. Interior Design of a Residential Building 15.3. Principles of Landscaping 15.4. Elements of Landscaping 15.5. Selection of Landscape Design elements.

## Basic Civil Engineering – Short Answer Questions & Answers

247 – 27

# PART B – BASIC MECHANICAL ENGINEERING

## UNIT – III

### Chapter 16 – SOURCES OF ENERGY

275 – 27

16.1 Introduction 16.2 Sources of Energy 16.2.1 Non-renewable (or) Conventional energy sources 16.2.2. Non-conventional or Renewable Energy Sources

### Chapter 17 – POWER PLANTS

280 – 30

17.1 Introduction 17.2 Classification 17.3 Steam (Thermal) Power Plant 17.3.1. Circuits of Steam Power Plant 17.3.2. Working of Thermal Power Plants 17.3.3. Advantages of Steam Power Plant 17.3.4. Disadvantages of Steam Power Plants 17.4 Hydro Electric Power Plants 17.4.1. Components of Hydro Electric Power Plant 17.4.2. Working of Hydro-Electric Power Plants 17.4.3. Advantages of Hydro-Electric Power Plants 17.4.4. Disadvantages of Hydro Electric Power Plants 17.5. Diesel Engine Power Plant 17.5.1. Components of Diesel Power Plant 17.5.2. Working Principle 17.5.3. Advantages of Diesel Engine Power Plants 17.5.4. Disadvantages of Diesel Engine Power Plant 17.5.5. Applications of Diesel Engine Power Plant 17.6. Gas Turbine Power Plants 17.6.1. Components of Gas Turbine Power Plant 17.6.2. Working of Gas Turbine Power Plant 17.6.3. Advantages of Gas Turbine Power Plant 17.6.4. Disadvantages of Gas Turbine Power Plant 17.6.5. Applications of Gas Turbine Power Plants in India 17.7. Nuclear Power Plants 17.7.1. Nuclear Fission 17.7.2. Chain Reaction 17.7.3. General Components of Nuclear Reactor 17.7.4. Main Components of Nuclear Power Plant 17.7.5 Working Principle of Nuclear Power Plant 17.7.6. Advantages of Nuclear Power Plant 17.7.7. Disadvantages of Nuclear Power Reactor 17.7.8. Nuclear Fusion

### Chapter 18 – TURBINES

304 – 31

18.1. Introduction 18.2. Turbines 18.3. Classification of Hydraulic Turbines 18.4. Pelton Wheel Turbine 18.5. Radial Flow Reaction Turbines 18.6. Francis Turbine 18.7. Axial Flow Reaction Turbine

### Chapter 19 – PUMPS

314 – 31

19.1. Introduction 19.2. Pumping Theory 19.3. Uses of Pump 19.4. Classification of Pumps 19.5. Positive Displacement Pumps 19.6. Non-positive Displacement Pumps.

PRINCIPAL,  
INFO INSTITUTE OF ENGINEERING,  
N.H.209, SATHY ROAD, KOVILPALAYAM,  
COIMBATORE - 641 107

## Chapter 20 – CENTRIFUGAL PUMPS

318 – 3

20.1. Introduction 20.2. Centrifugal Pump 20.3. Principle of Centrifugal Pump 20.4. Parts of Centrifugal pump 20.4.1. Impeller 20.4.2. Casing 20.5. Working of a Centrifugal Pump 20.6. Priming 20.7. Application of Centrifugal Pump 20.8. Multistage Pumps 20.9. Multistage Pump (Pumps in Series) 20.10. Multistage Pump (Pumps in Parallel)

## Chapter 21 – RECIPROCATING PUMPS

327 – 3

21.1. Introduction 21.2. Classification of Reciprocating Pumps 21.3 Construction of a Reciprocating Pump 21.4. Working of Single Acting Reciprocating Pump 21.5. Working of Double Acting Reciprocating Pump 21.6. Comparison between Centrifugal Pump and Reciprocating Pump

## Chapter 22 – INTERNAL COMBUSTION ENGINES

332 – 3

22.1 Introduction 22.2 External Combustion Engines 22.3 Internal Combustion Engines 22.3.1. Comparison of E.C. engines and I.C. engines 22.4. I.C. Engines as the Power Plant of Automobiles 22.5 Components of an I.C. Engine 22.6 Classification of I.C. Engines 22.7 Terminology 22.8 Comparison of Petrol and Diesel Engines 22.9. Four-stroke Cycle Petrol Engine 22.10 Four-stroke Cycle Diesel Engine 22.11. Two-stroke Vs Four-stroke Cycle Engines 22.12 Two-stroke Cycle Petrol Engine 22.13. Two-stroke Cycle Diesel Engine 22.14. Comparison of Four Stroke and Two Stroke Engines

## Chapter 23 – BOILER AS A POWER PLANT

352 – 3

23.1 Introduction 23.2 Essential Properties of a Good Steam Boiler 23.3 Selection of Steam Boiler 23.4 Classifications of Steam Boilers 23.5 Simple Vertical Boiler 23.6 Babcock and Wilcox boiler 23.7. Boiler as a Power Plant

## Chapter 24 – REFRIGERATION

362 – 3

24.1. Introduction 24.2. Methods of Refrigeration 24.3. Application of Refrigeration 24.4. Terminologies 24.5. Vapour Compression Refrigeration System (VCR) 24.5.1. Introduction 24.5.2. Applications 24.5.3. Components of Vapour compression refrigeration system 24.6. Vapour Absorption Refrigeration System (VAR) 24.7. Comparison of VCR and VAR Systems 24.8. Refrigerants 24.8.1. Desirable properties of a Good Refrigerant 24.8.2. Some of the Refrigerants 24.6. Domestic refrigerator

## Chapter 25 – AIR-CONDITIONING

374 – 3

25.1. Introduction 25.2. Applications of Air Conditioning 25.3. Psychrometry 25.4. Psychrometric chart 25.5. Qualities of Air Required for Air-conditioning 25.6. Loads Encountered in Air-conditioning systems 25.7. Classification of Air Conditioning Systems 25.8. The Comfort Air-conditioning 25.9. Window Air-conditioner

## Basic Mechanical Engineering – Short Answer Questions & Answers

387 – 4

This book deals with the syllabi requirements of ANNA UNIVERSITY (Regulations 2021) and other Deemed Universities in Tamilnadu. Fundamental concepts are explained with neat diagrams and illustrative examples are presented for clear understanding of the subject. Best selling textbook, widely used by both faculty and students for its uniqueness of presentation of the subject in simple and lucid manner.

Dr.N.KOTTISWARAN is the Principal of INFO Institute of Engineering, Coimbatore. He has graduated in Civil Engineering from Coimbatore Institute of Technology, Coimbatore and obtained his master degree in Structural Engineering from P.S.G College of Technology, Coimbatore. He has been awarded doctoral degree by Bharathiar University for his thesis "Study on strength and behaviour of thin walled cold formed steel - concrete composite beams under flexure and shear."

#### Salient features

- Clear and lucid presentation of the subject.
- A large number of worked out examples
- Typical solved university questions in each chapter
- More number of exercise problems with answers
- Inclusion of chapter objectives and review questions
- Provides a step-by-step approach for solving the problems

# Contents

<b>1</b>	<b>Introduction</b>	<b>1 - 1</b>
1.1	Importance of Engineering Mechanics .....	3
1.2	Particle and Rigid body.....	3
1.3	Mass and Weight .....	4
1.4	Units of measurements .....	4
1.5	Laws of Mechanics.....	6
1.6	Principle of Transmissibility of forces .....	6
1.7	Lami's theorem.....	6
1.8	Parallelogram law of forces .....	7
1.9	a) Triangle law of forces.....	7
	b) Polygon law of forces.....	7
1.10	Scalar and vector Quantities.....	7
1.11	Vector and vector operations .....	8
1.12	System of forces .....	15
	Review Questions .....	19

<b>2</b>	<b>Statics of Particles in Two Dimensions - Resultant force</b>	<b>20 - 5</b>
2.1	Introduction .....	21
2.2	Resultant force .....	21
2.3	Resultant force of collinear forces.....	22
2.4	Resultant force of concurrent forces .....	23
2.5	Resultant force - Graphical method .....	38
	Solved University Questions .....	39
	Review Questions .....	48
	Problems for practice.....	48
	Answers.....	50

<b>3</b>	<b>Equilibrium of Particles in Two Dimensions</b>	<b>51 - 5</b>
3.1	Introduction .....	52
3.2	Equilibrium and Equilibrant.....	52
3.3	Conditions of Equilibrium.....	52
3.4	Principles of Equilibrium .....	53

*Info*

3.5	Solution of Equilibrium of coplanar forces.....	53
3.6	Lami's theorem.....	54
3.7	Free body diagram.....	58
3.8	Action and Reaction.....	60
3.9	Types of Equilibrium.....	80
	Solved University Questions.....	81
	Review Questions.....	94
	Problems for practice.....	94
	Answers .....	97

## **4** Forces in Space - Resultant and Equilibrium of Particles In Three Dimensions (Vector Approach)

98 - 131

4.1	Introduction .....	99
4.2	Vector Approach.....	99
4.3	Force Vector.....	100
4.4	Rectangular Components of a Force.....	100
4.5	Writing the given force in Vector form.....	102
4.6	Important Vector operations.....	103
4.7	Position vector .....	104
4.8	Force vector interms of co-ordinates .....	104
4.9	Resultant force of coplanar concurrent force system.....	106
4.10	Conclusion.....	108
4.11	Rectangular components of a force in space .....	108
4.12	Direction cosines .....	110
4.13	Unit vector.....	111
4.14	Position vector .....	111
4.15	Force vector when two points on its line of action are given ..	111
4.16	Resultant force of a force system in space .....	115
4.17	Equilibrium of particles in space.....	116
	Solved University Questions.....	124
	Review Questions.....	129
	Problems for practice.....	129
	Answers.....	131

## **5** Statics of Rigidbodies In Two Dimensions -

### Resultant force

132 - 161

K.1	Introduction .....	133
-----	--------------------	-----

5.2	Resultant force of parallel forces .....	133
5.3	Varignon's theorem .....	135
	Solved University Questions .....	151
	Review Questions.....	161
	Problems for Practice .....	161
	Answers .....	163

## **6** Statics of Rigid bodies – Force-Couple System 164 – 192

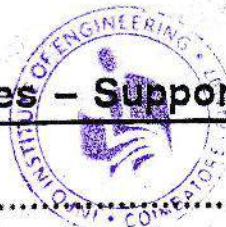

6.1	Introduction.....	165
6.2	Couple .....	165
6.3	Types of couple.....	166
6.4	Resolution of a force into a force and a couple at a point.....	167
	Solved University Questions .....	182
	Review Questions.....	189
	Problems for Practice .....	189
	Answers.....	192

## **7** Equilibrium of Rigid bodies in Two Dimensions 193 – 212

7.1	Introduction.....	194
7.2	Conditions of Equilibrium .....	194
7.3	Equations of equilibrium for special cases.....	195
7.4	Principles of Equilibrium .....	196
7.5	Freebody diagram of a rigid body .....	197
	Solved University Questions .....	206
	Review Questions .....	211
	Problems for Practice .....	211
	Answers .....	212

## **8** Equilibrium of Rigid bodies – Support Reactions 213 – 250

8.1	Introduction.....	214
8.2	Support reactions of beams .....	214
8.3	Statically determinate structure.....	219
8.4	Analytical method of finding support reactions of a beam.....	219
8.5	Moment of uniformly varying load .....	234
8.6	Support reactions of trusses .....	236
	Solved University Questions.....	240
	Review Questions.....	250

PROBLEMS FOR PRACTICE .....	250
Answers.....	252

**9 Analysis of Pin Jointed Plane Trusses** 253 – 315

9.1 Introduction.....	254
9.2 Frame and Truss .....	254
9.3 Classification of Trusses .....	254
9.4 Perfect frame.....	256
9.5 Imperfect frame .....	256
9.6 Common types of Roof Trusses .....	257
9.7 Assumptions made in the Analysis of Perfect frame .....	257
9.8 Analysis of Perfect frame.....	257
9.9 Nature of Member force .....	258
9.10 Method of Joints .....	259
9.11 Special Conditions .....	260
9.12 Analysis of Cantilever Trusses by Method of Joints.....	288
9.13 Method of Sections.....	292
9.14 Tension Co-efficient Method.....	302
Problems for Practice .....	311
Answers.....	314

**10 Forces in Space - Resultant and Equilibrium of Rigid bodies in Three Dimensions (Vector Approach)** 316 – 346

10.1 Introduction.....	317
10.2 Moment of a force .....	317
10.3 Resultant force of spatial parallel forces .....	325
10.4 Equilibrium of spatial parallel forces.....	327
10.5 Resultant force of Non-concurrent and Non-parallel forces .....	328
10.6 Couple in vector form .....	329
10.7 Equilibrium of Non-concurrent and Non-parallel spatial forces.....	333
10.8 Equilibrium of Rigid bodies in three dimensions.....	334
10.9 Procedure for Analysis .....	336
Solved University Questions.....	341
Review Questions.....	344
Problems for practice.....	344

## 21 Kinetics of Particles - Impact of elastic bodies

763 - 79

21.1 Introduction.....	764
21.2 Impact of Elastic bodies .....	764
21.3 Types of impact.....	764
21.4 Period of restitution and coefficient of restitution .....	766
21.5 Method of analysis.....	769
21.6 Direct central impact.....	771
21.7 Oblique central impact.....	776
21.8 Impact of a body with a fixed plane .....	780
21.9 Kinetic energy lost at impact .....	785
Solved University Questions .....	788
Review Questions.....	792
Problems for Practice .....	792
Answers.....	794

## 22 Kinematics of Rigidbodies

795 - 8

22.1	Introduction .....	796
22.2	Plane rigidbody motion .....	796
22.3	Translation .....	797
22.4	Rotation about a fixed axis .....	798
22.5	Equations of motion of rotation .....	799
22.6	Comparison between linear motion and angular motion .....	800
22.7	Relation between linear motion and angular motion .....	801
22.8	General plane motion .....	810
22.9	Absolute and Relative velocity in plane motion .....	811
22.10	Rolling of wheel without slipping .....	812
22.11	Crank-Connecting rod mechanism .....	822
22.12	Instantaneous centre of rotation .....	828
22.13	Absolute and Relative acceleration in plane motion .....	838
	Review Questions .....	840
	Problems for Practice .....	841
	University Questions .....	845
	Answers .....	846

## 23 Kinetics of Rigidbodies

848 -

23.1	Equations of motion.....	849
23.2	Kinetic analysis of Rigidbody motion.....	851
23.3	D'Alembert's Principle.....	851
23.4	Impulse - Momentum Principle.....	864
23.5	Work-energy Principle.....	869
23.6	Comparison between linear motion and rotational motion.....	870
	Solved University Questions.....	875
	Problems for Practice .....	876
	Answers.....	878

This book deals with the syllabi requirements of ANNA UNIVERSITY (Regulations 2017) and other Deemed Universities in Tamilnadu. Fundamental concepts are explained with neat diagrams and illustrative examples are presented for clear understanding of the subject. Best selling textbook, widely used by both faculty and students for its uniqueness of presentation of the subject in simple and lucid manner.

### Salient features

- Clear and lucid presentation of the subject.
- A large number of worked out examples
- Typical solved university questions in each chapter
- More number of exercise problems with answers
- Inclusion of chapter objectives and review questions
- Provides a step-by-step approach for solving the problems

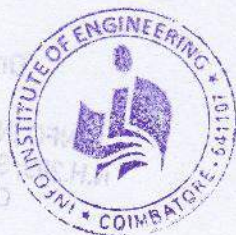

Dr.N.KOTTISWARAN is the Principal of INFO Institute of Engineering, Coimbatore. He has graduated in Civil Engineering from Coimbatore Institute of Technology, Coimbatore and obtained his master degree in Structural Engineering from P.S.G College of Technology, Coimbatore. He has been awarded doctoral degree by Bharathiar University for his thesis "Study on strength and behaviour of thin walled cold formed steel - concrete composite beams under flexure and shear."

FREE booklet as a supplement containing more than 300 fully solved Anna University questions and about 350 short answer questions with answers.

# Contents

<b>1</b>	<b>Introduction</b>	<b>1 - 1</b>
1.1	Importance of Engineering Mechanics .....	3
1.2	Particle and Rigid body.....	3
1.3	Mass and Weight .....	4
1.4	Units of measurements .....	4
1.5	Laws of Mechanics.....	6
1.6	Principle of Transmissibility of forces .....	6
1.7	Lami's theorem.....	6
1.8	Parallelogram law of forces .....	7
1.9	a) Triangle law of forces.....	7
	b) Polygon law of forces.....	7
1.10	Scalar and vector Quantities.....	7
1.11	Vector and vector operations .....	8
1.12	System of forces .....	15
	Review Questions .....	19

<b>2</b>	<b>Statics of Particles in Two Dimensions - Resultant force</b>	<b>20 - 5</b>
2.1	Introduction .....	21
2.2	Resultant force .....	21
2.3	Resultant force of collinear forces.....	22
2.4	Resultant force of concurrent forces .....	23
2.5	Resultant force - Graphical method .....	38
	Solved University Questions .....	39
	Review Questions .....	48
	Problems for practice.....	48
	Answers.....	50

<b>3</b>	<b>Equilibrium of Particles in Two Dimensions</b>	<b>51 - 5</b>
3.1	Introduction .....	52
3.2	Equilibrium and Equilibrant.....	52
3.3	Conditions of Equilibrium.....	52
3.4	Principles of Equilibrium .....	53

3.5	Solution of Equilibrium of coplanar forces.....	53
3.6	Lami's theorem.....	54
3.7	Free body diagram.....	58
3.8	Action and Reaction.....	60
3.9	Types of Equilibrium.....	80
	Solved University Questions.....	81
	Review Questions.....	94
	Problems for practice.....	94
	Answers .....	97

## **4** Forces in Space - Resultant and Equilibrium of Particles In Three Dimensions (Vector Approach)

98 - 131

4.1	Introduction .....	99
4.2	Vector Approach.....	99
4.3	Force Vector.....	100
4.4	Rectangular Components of a Force.....	100
4.5	Writing the given force in Vector form.....	102
4.6	Important Vector operations.....	103
4.7	Position vector .....	104
4.8	Force vector interms of co-ordinates .....	104
4.9	Resultant force of coplanar concurrent force system.....	106
4.10	Conclusion.....	108
4.11	Rectangular components of a force in space .....	108
4.12	Direction cosines .....	110
4.13	Unit vector.....	111
4.14	Position vector .....	111
4.15	Force vector when two points on its line of action are given ..	111
4.16	Resultant force of a force system in space .....	115
4.17	Equilibrium of particles in space.....	116
	Solved University Questions.....	124
	Review Questions.....	129
	Problems for practice.....	129
	Answers.....	131

## **5** Statics of Rigidbodies In Two Dimensions -

### Resultant force

132 - 161

K.1	Introduction .....	133
-----	--------------------	-----

5.2	Resultant force of parallel forces .....	133
5.3	Varignon's theorem .....	135
	Solved University Questions .....	151
	Review Questions.....	161
	Problems for Practice .....	161
	Answers .....	163

## **6** Statics of Rigid bodies – Force-Couple System 164 – 192

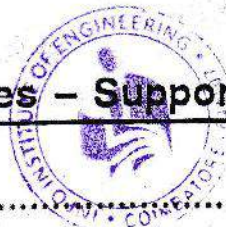

6.1	Introduction.....	165
6.2	Couple .....	165
6.3	Types of couple.....	166
6.4	Resolution of a force into a force and a couple at a point.....	167
	Solved University Questions .....	182
	Review Questions.....	189
	Problems for Practice .....	189
	Answers.....	192

## **7** Equilibrium of Rigid bodies in Two Dimensions 193 – 212

7.1	Introduction.....	194
7.2	Conditions of Equilibrium .....	194
7.3	Equations of equilibrium for special cases.....	195
7.4	Principles of Equilibrium .....	196
7.5	Freebody diagram of a rigid body .....	197
	Solved University Questions .....	206
	Review Questions .....	211
	Problems for Practice .....	211
	Answers .....	212

## **8** Equilibrium of Rigid bodies – Support Reactions 213 – 250

8.1	Introduction.....	214
8.2	Support reactions of beams .....	214
8.3	Statically determinate structure.....	219
8.4	Analytical method of finding support reactions of a beam.....	219
8.5	Moment of uniformly varying load .....	234
8.6	Support reactions of trusses .....	236
	Solved University Questions.....	240
	Review Questions.....	250

**9 Analysis of Pin Jointed Plane Trusses** 253 – 315

9.1 Introduction.....	254
9.2 Frame and Truss .....	254
9.3 Classification of Trusses .....	254
9.4 Perfect frame.....	256
9.5 Imperfect frame .....	256
9.6 Common types of Roof Trusses .....	257
9.7 Assumptions made in the Analysis of Perfect frame .....	257
9.8 Analysis of Perfect frame.....	257
9.9 Nature of Member force .....	258
9.10 Method of Joints .....	259
9.11 Special Conditions .....	260
9.12 Analysis of Cantilever Trusses by Method of Joints.....	288
9.13 Method of Sections.....	292
9.14 Tension Co-efficient Method.....	302
Problems for Practice .....	311
Answers.....	314

**10 Forces in Space - Resultant and Equilibrium of Rigid bodies in Three Dimensions (Vector Approach)** 316 – 346

10.1 Introduction.....	317
10.2 Moment of a force .....	317
10.3 Resultant force of spatial parallel forces .....	325
10.4 Equilibrium of spatial parallel forces.....	327
10.5 Resultant force of Non-concurrent and Non-parallel forces .....	328
10.6 Couple in vector form .....	329
10.7 Equilibrium of Non-concurrent and Non-parallel spatial forces.....	333
10.8 Equilibrium of Rigid bodies in three dimensions.....	334
10.9 Procedure for Analysis .....	336
Solved University Questions.....	341
Review Questions.....	344
Problems for practice.....	344

## **5** Statics of Rigidbodies In Two Dimensions -

### Resultant force

132 - 161

K.1	Introduction .....	133
-----	--------------------	-----

5.2	Resultant force of parallel forces .....	133
5.3	Varignon's theorem .....	135
	Solved University Questions .....	151
	Review Questions.....	161
	Problems for Practice .....	161
	Answers .....	163

## **6** Statics of Rigid bodies – Force-Couple System 164 – 192

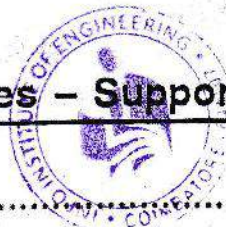

6.1	Introduction.....	165
6.2	Couple .....	165
6.3	Types of couple.....	166
6.4	Resolution of a force into a force and a couple at a point.....	167
	Solved University Questions .....	182
	Review Questions.....	189
	Problems for Practice .....	189
	Answers.....	192

## **7** Equilibrium of Rigid bodies in Two Dimensions 193 – 212

7.1	Introduction.....	194
7.2	Conditions of Equilibrium .....	194
7.3	Equations of equilibrium for special cases.....	195
7.4	Principles of Equilibrium .....	196
7.5	Freebody diagram of a rigid body .....	197
	Solved University Questions .....	206
	Review Questions .....	211
	Problems for Practice .....	211
	Answers .....	212

## **8** Equilibrium of Rigid bodies – Support Reactions 213 – 250

8.1	Introduction.....	214
8.2	Support reactions of beams .....	214
8.3	Statically determinate structure.....	219
8.4	Analytical method of finding support reactions of a beam.....	219
8.5	Moment of uniformly varying load .....	234
8.6	Support reactions of trusses .....	236
	Solved University Questions.....	240
	Review Questions.....	250

# Engineering Graphics

In First Angle Projection

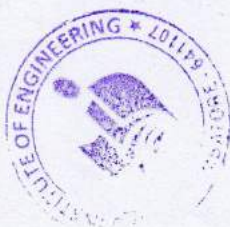

Multi Colour Edition

This book is designed for First Year B.E /B.Tech Students of all disciplines. Basic and Fundamental concepts are focused. Necessary supporting diagrams including Pictorial view and visualisation of the object are presented for the solution of problems.

Dr.N.KOTTISWARAN is the Principal of **INFO Institute of Engineering**, Coimbatore, having more than 25 years of experience in teaching, research and administration. He has graduated from Coimbatore institute of Technology, Coimbatore and obtained his master degree from PSG College of Technology, Coimbatore. He has been awarded Doctoral degree by Bharathiar University, Coimbatore. He has authored many books including the most popular book "Engineering Mechanics."

Free booklet as a supplement containing solutions to ANNA UNIVERSITY Questions

	Page No.
1 Introduction to Engineering Graphics	1.1 - 1.5
2 Drawing Instruments and Sheet Layout	2.1 - 2.11
3 Lines, Lettering and Dimensioning	3.1 - 3.20
4 Geometrical Constructions	4.1 - 4.14
5 Scales	5.1 - 5.13
6 Conic Sections	6.1 - 6.17
7 Engineering Curves	7.1 - 7.17
8 Introduction to Systems of Projection	8.1 - 8.3
9 Orthographic Projection	9.1 - 9.52
10 Freehand Sketching	10.1 - 10.10
11 Projections of Points	11.1 - 11.8
12 Projections of Straight Lines	12.1 - 12.37
13 Projections of Planes	13.1 - 13.33
14 Projections of Solids	14.1 - 14.50
15 Sections of Solids	15.1 - 15.37
16 Development of Surfaces	16.1 - 16.56
17 Isometric Projection	17.1 - 17.56
18 Perspective Projection	18.1 - 18.44

This book deals with the syllabi requirements of ANNA UNIVERSITY (Regulations 2017) and other Deemed Universities in Tamilnadu. Fundamental concepts are explained with neat diagrams and illustrative examples are presented for clear understanding of the subject. Best selling textbook, widely used by both faculty and students for its uniqueness of presentation of the subject in simple and lucid manner.

### Salient features

- Clear and lucid presentation of the subject.
- A large number of worked out examples
- Typical solved university questions in each chapter
- More number of exercise problems with answers
- Inclusion of chapter objectives and review questions
- Provides a step-by-step approach for solving the problems

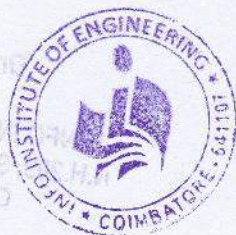

Dr.N.KOTTISWARAN is the Principal of INFO Institute of Engineering, Coimbatore. He has graduated in Civil Engineering from Coimbatore Institute of Technology, Coimbatore and obtained his master degree in Structural Engineering from P.S.G College of Technology, Coimbatore. He has been awarded doctoral degree by Bharathiar University for his thesis "Study on strength and behaviour of thin walled cold formed steel - concrete composite beams under flexure and shear."

FREE booklet as a supplement containing more than 300 fully solved Anna University questions and about 350 short answer questions with answers.

PROBLEMS FOR PRACTICE .....	250
Answers.....	252

**9 Analysis of Pin Jointed Plane Trusses** 253 – 315

9.1 Introduction.....	254
9.2 Frame and Truss .....	254
9.3 Classification of Trusses .....	254
9.4 Perfect frame.....	256
9.5 Imperfect frame .....	256
9.6 Common types of Roof Trusses .....	257
9.7 Assumptions made in the Analysis of Perfect frame .....	257
9.8 Analysis of Perfect frame.....	257
9.9 Nature of Member force .....	258
9.10 Method of Joints .....	259
9.11 Special Conditions .....	260
9.12 Analysis of Cantilever Trusses by Method of Joints.....	288
9.13 Method of Sections.....	292
9.14 Tension Co-efficient Method.....	302
Problems for Practice .....	311
Answers.....	314

**10 Forces in Space - Resultant and Equilibrium of Rigid bodies in Three Dimensions (Vector Approach)** 316 – 346

10.1 Introduction.....	317
10.2 Moment of a force .....	317
10.3 Resultant force of spatial parallel forces .....	325
10.4 Equilibrium of spatial parallel forces.....	327
10.5 Resultant force of Non-concurrent and Non-parallel forces .....	328
10.6 Couple in vector form .....	329
10.7 Equilibrium of Non-concurrent and Non-parallel spatial forces.....	333
10.8 Equilibrium of Rigid bodies in three dimensions.....	334
10.9 Procedure for Analysis .....	336
Solved University Questions.....	341
Review Questions.....	344
Problems for practice.....	344
Answers.....	346

## 20 Kinetics of Particles - Impulse and Momentum

737 - 76

20.1 Introduction.....	738
20.2 Impulse of a force .....	738
20.3 Momentum.....	739
20.4 Impulse - Momentum equation.....	739
20.5 Motion of Connected bodies - Impulse-Momentum equation ...	745
20.6 Conservation of linear momentum.....	747
20.7 Motion of Bullet and Gun.....	749
Solved University Questions.....	757
Review Questions.....	761
Problems for Practice .....	761
Answers.....	762

## 21 Kinetics of Particles - Impact of elastic bodies

763 - 79

21.1 Introduction.....	764
21.2 Impact of Elastic bodies .....	764
21.3 Types of impact.....	764
21.4 Period of restitution and coefficient of restitution .....	766
21.5 Method of analysis.....	769
21.6 Direct central impact.....	771
21.7 Oblique central impact.....	776
21.8 Impact of a body with a fixed plane .....	780
21.9 Kinetic energy lost at impact .....	785
Solved University Questions .....	788
Review Questions.....	792
Problems for Practice .....	792
Answers.....	794

## 22 Kinematics of Rigidbodies

795 - 8

22.1	Introduction .....	796
22.2	Plane rigidbody motion .....	796
22.3	Translation .....	797
22.4	Rotation about a fixed axis .....	798
22.5	Equations of motion of rotation .....	799
22.6	Comparison between linear motion and angular motion .....	800
22.7	Relation between linear motion and angular motion .....	801
22.8	General plane motion .....	810
22.9	Absolute and Relative velocity in plane motion .....	811
22.10	Rolling of wheel without slipping .....	812
22.11	Crank-Connecting rod mechanism .....	822
22.12	Instantaneous centre of rotation .....	828
22.13	Absolute and Relative acceleration in plane motion .....	838
	Review Questions .....	840
	Problems for Practice .....	841
	University Questions .....	845
	Answers .....	846

## 23 Kinetics of Rigidbodies

848 -

23.1	Equations of motion.....	849
23.2	Kinetic analysis of Rigidbody motion.....	851
23.3	D'Alembert's Principle.....	851
23.4	Impulse - Momentum Principle.....	864
23.5	Work-energy Principle.....	869
23.6	Comparison between linear motion and rotational motion.....	870
	Solved University Questions.....	875
	Problems for Practice .....	876
	Answers.....	878

# Engineering Graphics

In First Angle Projection

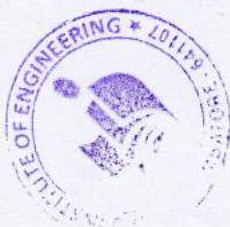

Multi Colour Edition

This book is designed for First Year B.E /B.Tech Students of all disciplines. Basic and Fundamental concepts are focused. Necessary supporting diagrams including Pictorial view and visualisation of the object are presented for the solution of problems.

Dr.N.KOTTISWARAN is the Principal of **INFO Institute of Engineering**, Coimbatore, having more than 25 years of experience in teaching, research and administration. He has graduated from Coimbatore institute of Technology, Coimbatore and obtained his master degree from PSG College of Technology, Coimbatore. He has been awarded Doctoral degree by Bharathiar University, Coimbatore. He has authored many books including the most popular book "Engineering Mechanics."

Free booklet as a supplement containing solutions to ANNA UNIVERSITY Questions

# Contents

	Page No.
1 Introduction to Engineering Graphics	1.1 - 1.5
2 Drawing Instruments and Sheet Layout	2.1 - 2.11
3 Lines, Lettering and Dimensioning	3.1 - 3.20
4 Geometrical Constructions	4.1 - 4.14
5 Scales	5.1 - 5.13
6 Conic Sections	6.1 - 6.17
7 Engineering Curves	7.1 - 7.17
8 Introduction to Systems of Projection	8.1 - 8.3
9 Orthographic Projection	9.1 - 9.52
10 Freehand Sketching	10.1 - 10.10
11 Projections of Points	11.1 - 11.8
12 Projections of Straight Lines	12.1 - 12.37
13 Projections of Planes	13.1 - 13.33
14 Projections of Solids	14.1 - 14.50
15 Sections of Solids	15.1 - 15.37
16 Development of Surfaces	16.1 - 16.56
17 Isometric Projection	17.1 - 17.56
18 Perspective Projection	18.1 - 18.44
